## CLIMATE "CRISIS" – THE ROYAL ROAD TO ECONOMIC AND ECOLOGICAL CATASTROPHE FOR OREGON

To The (un)Super Majority:

You are getting set to impose MILLIONS OF TAXING DOLLARS upon Oregonians for a "crisis" that 1) you haven't even proved that exists, 2) that CO2 is causing it, and 3) that your millions of tax dollars will fix it. YOU HAVE PROVED NONE OF THESE THREE POINTS!!! and yet you are plowing ahead with an agenda that will raise the cost of EVERYTHING we buy because fuel and electricity costs are embedded in everything we buy.

There is NO PROVEN CRISIS <https://www.europereloaded.com/500-climate-scientists-write-to-un-there-is-no-climate-emergency/>

The effect of CO2 is NEGLIGIBLE <https://edberry.com/blog/climate/climate-physics/contradictions-to-ipccs-climate-change-theory/>

Your plan is already a proven FAILURE <https://inconvenientfacts.xyz/blog/f/oregon-climate-action-plan-%E2%80%93-economic-pain-for-zero-benefits> Rich Germany has already tried and failed <https://quillette.com/2019/02/27/why-renewables-cant-save-the-planet/>

You are pulling the rug out from Oregon energy BEFORE THE TECHNOLOGY EXISTS TO REPLACE IT!!! There are huge environmental costs to solar and wind as it currently exists, especially including bird and animal loss. Sure, it is fine to pursue renewables but it must be done in a wise, prudent manner. Otherwise, sinking millions of tax dollars into already proven inefficient green energy technologies can only result in a net catastrophic loss for all Oregon.

You the super majority seem to be locked in a utopian mind-set not unlike other utopians of the past who have led their people into economic servitude and disaster.

**PLEASE STOP CLIMATE CRISIS LEGISLATION BEFORE YOU IRREPARABLY HARM OREGON!**
