Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Monday, February 3, 2020 4:19:18 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Benton Elliott

Subject: SB 1530 TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION

My name is Keith Edward Iding and I am from NE Portland. I am a retired DEQ Air Monitoring staff member.

Chair Dembrow, Vice-Chair Olsen, and Members of the Senate Interim Committee on Environment and Natural Resources, this testimony is submitted in favor of strong climate action in 2020.

- We are experiencing an increasing climate crisis that demands a strong response. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.
- SB 1530 needs to be strong to reduce pollution from fossil fuel natural gas and increase investments for the clean economy and to reduce emissions from oil companies all across the state. Investments into communities most affected by climate change should be guaranteed.
- Our most vulnerable populations, people in poverty have fewer resources to recover from the natural disasters brought on by climate change and therefore have the most to lose.
- Rural Oregonians are also on the front lines of climate change. Their voices shouldn't be ignored.
- Please build upon the work you have started with SB 1530 and pass this much needed climate legislation.

Please consider improvements to the transportation portion of the bill so all oil companies pay their fair share no matter where they're located so that all large polluters are held accountable.

Cap-and-invest will help reduce pollution, invest in good-paying jobs, improve our communities, and protect our health by cleaning up the air.

I write in support of legislation that will benefit all of Oregon and carry through with the unfinished business of HB 2020. - Please build upon the work you have started by making SB 1520 a successful example of successful climate legislation this session. We cannot afford to miss this critical opportunity to begin action.

Thank you for the essential work which you are doing.

Respectfully submitted,

Keith E. Iding
NE Portland
