To Committee Members re: SB 1530

The word is out. The clock is ticking. Everyday we hear new evidence of how our planet is responding to the change of our environment. Just yesterday the Guardian reported as to the accelerated rates we're seeing our sea levels rising that will negatively affect 40% of the US population who are living along our coastlines. You who hold the power to craft policy for our state, how are you responding to this existential crisis? I'm sure many of you have children and perhaps have grandchildren. What will you tell them about the role you played to counter one of the most significant crisis of any time.

Each of you are elected to put the interest of the residents of our state above all, what is our interest?

* It's in our interest to zero our carbon emissions as soon as possible. In truth 2050 is way too late. UN agency advises carbon neutral be achieved by 2030 for efficacy.

* It's in our interest to transition to alternative and sustainable energy sources and give the residents of our state the opportunity to be at the vanguard of this vital and

developing technology. The writing is on
the wall. Fossil fuels are on the way
out, it's just a matter of time.

I want to thank all of you for your
work on developing a climate policy that
will truly address the challenges we are
facing. I urge you to be Bold and make
policy that can truly help change the
trajectory we are now facing.

Sincerely,
Judy Arville Festal
