Subject: supporting passage of H.B. 4069
Date: Tuesday, February 4, 2020 3:49:16 PM

Since 1981 The Wetlands Conservancy, the “voice” of Oregon’s wetlands, has worked in partnership to protect Oregon’s greatest wetlands through conservation, collaboration and stewardship.

The Wetlands Conservancy urges passage of H.B.4069, authorizing the Water Resources Department to require reporting of water use measurements. From the imperiled magnificent estuaries of Yaquina and Alsea Bays to the high desert Harney and Malheur Lakes, from the Upper Klamath to Deschutes County, Oregonians value essential waterways, wetlands, tributaries, streams, groundwater and estuaries. H.B 4069 assists understanding of water availability, protect water rights in ground, helps to manage groundwater and water use efficiency, Protect our water sources by requiring reporting of water use measurements in Oregon!

The Wetlands Conservancy is a leader in Oregon wetland conservation.
