Note Please vote against Pay to Pollute.

The huge gasoline tax will put many transportation based companies out of business, as they will be unable to make a profit/a living, to provide for their families. Voting for Cap and Trade would make you party to creating poor, creating homelessness.

We are retired, own our home, living on social security, but through increased property taxes and now this proposed increase in gasoline and natural gas heating costs, we are being priced out of our home.

Many of our friends tell us the same thing. Many moved to Arizona or Texas due to increased financial pressures, forced to leave grown family members, grandchildren behind, further dividing families.

PLEASE vote AGAINST all versions of cap and trade.

You would be a hero for finding a smart, non partisan solution. Look to taking our forests back from the federal government, managing and profiting from it's sustainable use. There are many organizations working on this. This would pay all of Oregon's bills and completely fund our budget by using our natural renewable resources. Please enter this as public testimony.

I look forward to your response and will publish such in my many Oregon forums. Thank you for your consideration. Toni Carrasco and husband, Oregon voter
