Subject: Cap & Trade
Date: Thursday, February 6, 2020 6:04:46 AM

Members of the Committee,

To those of you who would support cap and trade.

If I weren't seeing how completely duped the American public has become with false gun control promises and the subterfuge that got us here, I wouldn't have believed what you are trying to get away with in Cap & Trade is real. But it is. Greed is powerful.

No, the science is NOT settled. And your own witnesses last year said what you are planning will have minimal effect on the environment but it will greatly hit hard working Oregonians. Especially lower income people, those you profess to protect.

If ever a saying has relevance in today's climate change hysteria (being manmade) it is today.... Follow The Money.

Thursday on the very steps of the Capitol building you will hear how you are bordering on willfully harming the economy and livelihoods of real people. No one coming to protest is in favor of destroying the environment and many attending are doing more than you imagine to foster its care.

Listen to scientists that are drowned out by a compliant media and the turned ear of reckless legislators. Some of those scientists will be attending. Stop what you are doing and walk out onto the steps or meet with them. There is truth to hear and ruin to avoid. Do not pass a reckless cap and trade Bill that will surely destroy our state. Slow down and see the whole picture.

Sincerely,
Sally Klein
