

Please vote no on this bill.

A yes vote would remove my ability to defend myself adequately in a situation in which my life were endangered by an intruder. Last year a couple, living less than a half mile away, had a potential home intruder march up the steps to their home. The older husband was able to stop the intruder quickly because his weapon was ready to use.

I believe this bill damages my rights and assumes I am an unreasonable person when it comes to gun safety. Also, I do not want to be the crook if someone breaks into my home and steals any weapons I might legally have.

Thank you for this opportunity to testify.
