

This is not acceptable. There is nothing in this bill that will prevent anything you say it will prevent. How do you assume you will enforce this law? Are you going to go home to home even those that don't have these items and make sure they are doing this properly? Are you going to create a bill like this for medications? Why not do this for cars, or alcohol or tobacco? When will we hold people accountable to the current laws and stop making up laws that don't help?

This is not what I pay my taxes for. I don't need more laws and wasting my tax payer money on things I don't agree with and is very offensive
