

Greetings. Did I see that members of law enforcement are exempt from provisions of this bill? Are their firearms less accessible when unattended and not properly secured? Are theirs less deadly to children or suicidal persons that this "emergency" bill proclaims to care about? I say nobody should be exempt. You hear about law enforcement weapons being stolen from vehicles or left behind in restroom stalls far too often. They should not get a free pass.

Other than that, great job in blaming victims of firearm theft. I'm not sure of any other property crime where the owner is punished for its theft and misuse.
