

This bill has been discussed, debated, and ruled against. But you Democrats like the ones at federal level continue to waste taxpayers money on issues that will not improve the issues at hand (normally increase the problem), promote improved safety or reduce the hardship on the citizens that this bill will affect. You continue to try and ram your bills and way of doing things down the taxpayers throats. Which whom pay you for your support, representation, service to them but you at every chance stab us in the back in order to get your agenda supported.
