

Regarding HB4005, This bill is akin to saying that anything the legislature proclaims as a law, they as a body then assume all liability which may be as a result of that law. This bill attaches an unreasonable liability to the safe guarding of private firearm ownership. this bill opens a whole host of other privately owned innate objects, autos, tools such as hammers, axes, anything that might be used as a weapon to cause bodily harm or death! This bill is very poorly written and violates at least 2 amendments of our constitution. Do not vote for this bill.
