

Some where, some how we people who believe in our rights and the rights of our properties must be able to get through to the Liberals in our government.

I am running for County Commissioner and if elected I will attempt to get a vote on the ballot for Umatilla County to tax every single iota of food that leaves Umatilla County for the I-5 Corridor that equates to the money that our citizens here are being taxed.

Your wanting to invade our homes of law abiding citizens is yet a further invasion of our privacy and your telling us how to take care of our assets are even a further invasion of our privacy; yet you approve LBGT's rights to privacy in their own homes so why are you discriminating against us?

We on the East side are fully fed up with all of the taxes and innuendos of "getting even" with us from Brown's office. It is up to you lawmakers that pass this garbage onto us without a vote of the people that is also totally wrong. If you and yours (congress in Oregon) want to tax us more or change the laws without a vote, we in Umatilla County will work against the Governors office in every way we can.

Your group rammed through that CAT tax and you were so greedy you couldn't even set up the procedures for the tax before you implemented it. Now I've heard at meetings where our government is allowing companies to move their responsibility to employees by withholding money from their paychecks for the CAT Tax. One woman will be providing me with a copy of her check tonight. What I heard at a meeting was that it wasn't supposed to be drilled down to employees. But hey what's the big deal with a \$1 a pay check, low income wage earners apparently don't need it.
