Date: Friday, February 7, 2020 11:51:12 AM

Oregon senators,

I am in strong support of SB 1530 cap and trade.

We as Oregonians have a moral duty to do all we can to protect our environment for the future of our planet and our children.

The scientific evidence is overwhelming. Unless we act NOW, it is increasingly likely we will all suffer from massive climate destruction which will lead to social and economic disruption.

We have a chance to join the effort to save the planet and our future. Don't squander it!!
