You need to let voters vote on SB 1530. It is cowardly to ramrod legislation through without letting the people of the great state of Oregon vote. I promise you we can understand the complexity of this piece of legislation. We aren't near the idiots you must think we are. I am starting to wonder about your intelligence though. If you don't think it will pass, then fix it! Please stop saying this bill is good for the climate. The people polluting the air still get to pollute the air, they just have to pay you for it. It literally does nothing for the environment. It only lines your already full pockets. The biggest polluters are big financial donors who get breaks and exemptions while the little guy will be forced out of business by this irresponsible legislation. All Oregonians will feel it through higher gas prices and higher prices for goods and services. Your policies are turning a great state into a disaster. And for what? So you can get more and more money? When will enough be enough? When we're all homeless?! Oh yeah, that's called socialism. Put this to a statewide vote and stop being cowards!!
