**Subject:** No on SB1530 - Our beautiful state depends on it!  
**Date:** Saturday, February 8, 2020 9:59:36 AM

---

Taxing the right to pollute and selling it to the highest bidder does not decrease or eliminate pollution!

I can't speak for all of Oregon but I for one am tired of the money grabbing bills shoved down our throats without even a say! It's sad to me that some of you believe that we the people, the ones who voted you in, aren't smart enough to read through, comprehend or understand the importance of these bills enough to vote on it! Just because we don't buy into your narrative doesn't mean we don't understand exactly what it says and what you're doing, we just disagree and would like to vote No as is our right!

You've been presented with a reasonable alternative and I hope you're willing to table SB1530 during the short session to take the time truly necessary to consider a more logical and less detrimental course of action!

You are single handedly changing Oregon and not for the better. I was once proud to be from the Pacific Northwest and Oregon Coast and now I'm embarrassed. Embarrassed by our State Government and their overreach, abuse and mistreatment of their people!

I encourage you to stop this madness, stop this asinine bill and stop neglecting the people's right to vote on what happens in their state!

Thank you,

Kaisa Davidson
