Subject: Opposing SB 1530
Date: Saturday, February 8, 2020 10:24:00 AM

Senator Dembrow & Members of the Committee:

I strongly oppose SB 1530. As a farm owner in the Klamath Basin we rely on the environment to raise the crops we sell as our only revenue source. The proposed legislation would not benefit the environment and would have a significant negative impact on our business.

It is hard enough to make a living as a farmer; only 1.3% of the US population takes on this career choice to feed our country. If this tax is imposed many of us will likely go out of business.

I urge you to oppose this bill and protect the American farmer.

Best Regards,

Lexi Crawford
