

I am strongly opposed to this bill. This impacts every single resident of this state and disproportionately impacts lower income households as well as rural communities. The talking points about rebates to help them is a smoke screen. You'd make them homeless and jobless before they got that assistance. There won't be any income for the state when the jobs and people leave for other places so they can actually live. In the meantime, this bill would have caused completely unnecessary, greedy, havoc in thousands, if not millions, of lives directly and indirectly. I know the Democrat super majority is "proud" to be a sanctuary state. Think you'll have migrants/immigrants living here when they can't afford the gas to get to jobs that disappeared as the farmers and ranchers lost their businesses due to over taxation and inability to compete with National and International markets? The goals of this bill have a negligible impact locally, nationally and internationally as to the climate. If the true goals are economic control of all who live here, then this bill would be a success and would show the true colors of anyone who supports it for that reprehensible reason. Stop listening to special interests who care more about their interests than the people who live in this state. Instead, listen to residents, like me, who see the whole picture of the impact of this bill. The rotten cherry on top of this destructive sundae you've created to appeal to the special interest groups is the lack of transparency built into it. That just proves the reprehensible true aim of this bill. Vote NO! If you can't find the personal fortitude to do the right thing morally by voting no, then at least remove the unnecessary emergency clause and put it to the people to vote. The right thing to do though, is vote NO! You were elected to represent us, not play our puppet masters nor guardian ad litem.
