

Hello,

I am a 5th generation Oregonian who opposes SB-1530 due to the devastating effects it will have on rural Oregonians. I am deeply offended that the current legislators think we the people are not smart enough to do our own research and come to our own conclusions on climate change legislation. I strongly urge you to please vote NO on this bill and instead let Oregonians vote on the issue for themselves.

Thank you,
Brandi Mullaney
