

Dear Members of the House Natural Resources Committee,

There's absolutely no need for our state to continue to hunt and kill wildlife in any capacity, especially in trophy hunting.

I support HB 4075 and hope that the fine increases for penalties. Our State should support conservation initiatives and not allow people to continue to kill native species and destroy habitats.

We already have enough environmental problems as is. We need to keep our ecosystems full of native species that are actually doing what nature intended for them to do, instead of having people hunt and parade slaughter.

I urge you to please consider your decision carefully and protect wildlife. I am very passionate about my State and I want to have coyotes and other native species be protected and not killed for ruthless sport and prizes.

Thank you,
Desiree M.
