

As a 48 year Oregon resident, Josephine county, I ask you to please vote no on SB 1530, Cap and Trade. This bill is flawed and should not be rushed through. Ideally it should be put on a ballot to be voted on by those it will affect! I feel that the overuse of the "emergency clause" for getting pet bills passed is the very definition of abuse of power. This bill contains wording that exempts the spending of the money received from being accessible in public record, for us to see. Why would that be the case? How much impact does the state of Oregon have on climate change? Is it worth losing businesses over? It seems like this is just another attempt to unlawfully (abuse of power) take money from the people of Oregon. This will adversely affect our small business. Please consider the will of the people and put this to a vote!
