Dear Representatives and Senators:

I came up from Southern Oregon today with the intent of testifying today at your hearing on HB 4105, which was introduced by my Senator among others.

Already fossil fuels ~~are~~ expansion is a grave danger to the climate. All of my sons work as landscapers and farmers whose livelihood is jeopardized by wildfire smoke - which we know is driven by climate chaos. I myself become a climate refugee most summers because I have respiratory disease that is life-threatening when Ashland is swathed in smoke. But these personal reasons are not my primary reasons for coming to Salem today.
(over)

I implore you to pass
HB 4004 restricting fossil fuel
expansion on state land —
not just on behalf of my family
but on behalf of future
generations. Please support
HB 4105 as one important
step toward passing on a
liveable remnant of the
world we inherited.

! Thank you,
Joan Kalvelager, PhD
