Date: Sunday, February 9, 2020 11:11:27 AM

Please vote No on HB 1530. This is a measure that should be put before the voters. We need to be able to have our say on whether we want this or not. And please drop the emergency clause. There is no emergency other than one party wanting to rush through legislation the general populace opposes.

Oregon could make way more money selling carbon credits to other states (think Calif!).
Something to think about!

Sincerely,
Lorraine Sherman
