Hello,

I am a single mother landlord and would not want to have this measure pass. Us mom and pop businesses are doing the best we can. I am in favor of affordable housing and don't mind contributing to this since I know first hand about life threu housing assistance. I understand that everyone deserves a place to live but landlord are being punished for trying to help ourselves. There has to be something else we can do to help besides always thinking of a way to come after landlords.

Sincerely
Suzette Bryant
