I would like you not to agree to the cap and trade bill. I would one if you are insist on this then it needs to go-to the voters. If you want other ideas that don't cripple every one in Oregon I would like to look at an alternative to see if it is sustainable. I have been following Australia and there plastic neutral process that won't break the backs of hard working Americans and may actually help the environment. I know that isn't what you are wanting to actually do since this bill does nothing different. Just smoke and mirrors at the end of the day we are taking from one giving to another so it is just as it is today but sounds good to your ears and pocket book. The problem with that is that eventually the money runs out then what you can't even manage the amount you have now always robbing Peter to pay Paul and still come up short.
