

I live in Medford Oregon and consider myself a rural Oregonian. I support SB 1530 because I care about the trees and the animals who are dying due to climate change right now. I also care about my grandchildren who will be dying pretty soon if you keep refusing to do something about climate change and don't something drastic. We need it NOW. All Oregonians need to be proud that you, our legislators are independent enough, have the pioneer spirit to stand up to the \$\$\$ interests and pass meaningful climate legislation.

I cannot beg you strongly enough, pass SB 1530. I cannot make the trip to Salem to entreat you in person at your hearing. Please ignore the people in the big trucks, wearing the yellow vests and getting PAID by the big extraction industries who don't care about anything but \$\$\$\$. They do not want to protect the future. You are entrusted with our future, mine and my grandchildren's futures. Help please
