

Dear Chair Dembrow,

As a third generation farmer/Rancher, I am appalled at the consistent abuse, and amendments to SB1530. This bill will cost my farm thousands of dollars for what. So the State can have more money to squander. This bill needs to be killed and buried, before it bankrupts the timber, farming, and ranching communities throughout the state. This bill is not about saving the planet, only about the money and power.

NO ON SB 1530

Sincerely,

Lucien Gunderman
