While I remain steady in opposition to this bill, id like to start by acknowledging the hard work and time put into the details. Id like to acknowledge the small compromises already made. And Id like to thank you for those.

I have seen science from both sides of the isle. I dont personally beleive in the "climate fate being sealed" aspect, but i appreciate the being safe insteady of sorry action.

All that being said, I urge you to please hear us too. We are begging. A farmer doesn't grow up and become a farmer. He becomes a farmer at 3 years old on his daddys knee. As you might remember my 9 year old daughter emma testified. As a gold miner, I know. My kids were strapped to my back before they could walk as i ran a dredge. Its not just what i do. Its who I am.

I ask you to scrap this plan. Bring us. Loggers. Farmers. Miners. Fishermen. To the table. Not representatives. Real workers from the industry. And lets make a plan that works for us all.

Thank you

Tasha Webb
