

I'm strongly in favor of Senate Bill 1530, and urge all our elected representatives to vote for this measure. Climate change is upon us and we must act now.

I appreciate that there has been an attempt to make the impacts of this bill easier on rural residents. Hopefully, rural residents can be helped to adjust/adapt through provision of robust EV charging infrastructure, and home energy saving programs. (If these measures are not included in the Bill, I hope that our representatives will consider supporting these types of initiatives in future.)

Respectfully,

Jessica Hanne Smith
