

I have timed getting into my combination three wheel gun container at around 30/45 seconds. A bad actor would be able to beat me with the container (FBI and TSA approved) before any defense.

I think tax breaks and running an information based ad campaign would be more effective. Last year when I was attacked it was a complete surprise. You cannot predict all the combinations in an attacking situation.

Giving non government entities (unelected) the authority to in effect dictate administrative rules will keep many lawers happy.

A blatant try to discourage the next generation from their natural right to experience the firearms world will backfire.

Encourage the gun clubs and school shooting programs.

The outside funding and nationwide agenda from the gun control groups show this is just an incremental step towards more confinement of our natural rights.

The legislature should be addressing campain funding.

Don't be a cheap date.

Vote NO on 4005 and all the other planned gun control issues sure to come up this session.

Sincerely,

James Bryant
