Measure Description:

Authorizes Public Utility Commission to allow electric companies to recover costs for prudent investments or expenses in infrastructure measures that support adoption of electric vehicles if certain criteria are met.

Revenue Impact:

There is no direct revenue impact, as the potential fees collected by electric companies as result of the passage of this bill are utility ratepayer fees, and not taxpayer revenues. In addition, the investments that would precipitate the cost recovery would be subject to the Oregon Public Utility Commission's regulatory process.
