HB 4166 -1 STAFF MEASURE SUMMARY

House Committee On Rules

Prepared By: Melissa Leoni, LPRO Analyst

Meeting Dates: 2/18

WHAT THE MEASURE DOES:

Authorizes the Department of Administrative Services (DAS) to contract for an independent economist to: (1) collect data and other information on the actual costs of and source of moneys used for wildfire protection and wildfire suppression on lands protected by the State Forestry Department; (2) identify ways to improve tracking and substantiate wildfire protection and suppression costs and funding sources; (3) compare Oregon wildfire protection and suppression costs and funding sources with comparable states; (3) identify regional differences in wildfire protection and suppression costs and funding sources; and, (4) provide data and information in a format to enable an informed discussion on the equitable allocation of wildfire protection and suppression costs and the value of wildfire protection and suppression toward the protection of private and public assets. Requires contracted economist to collaborate with project team or advisory group convened by DAS and appointed by the President of the Senate and Speaker of the House. Specifies team or group membership and required expertise. Requires report on findings and recommendations to Legislative Assembly and Governor's Council on Wildfire Response by economist and project team by November 30, 2020. Declares emergency; effective on passage.

ISSUES DISCUSSED:

EFFECT OF AMENDMENT:

-1 Clarifies project team or advisory group membership.

BACKGROUND:

Oregon Governor Kate Brown created the Governor's Council on Wildfire Response by executive order in January of 2019. The Council was tasked with reviewing Oregon's current model for wildfire prevention, preparedness, and response, and analyzing whether the current model is sustainable given increasing wildfire risks. The Council met regularly for nine months and formed three active subcommittees that focused on mitigation, fire suppression, and adaptation and recovery. The product of the Council's extensive work was a final report that concluded that some or all of the current models are not sufficient to ensure Oregon is prepared for increasingly severe wildfire seasons and that proposed 37 recommendations.
