

Thank you for your work representing me on the House Rules Committee. For me, climate change is the most important issue facing us today; it will affect our economy in all parts of Oregon, including where I live in rural southern Oregon.

I favor legislation which will reduce greenhouse gases as quickly as possible and will also help those who are most affected.

Do not let allowances destroy the intent of the bill. The polluters should pay; they failed to reduce their greenhouse gas emissions in 2007, which makes HB4167 necessary now.
