Hello,

Please accept this as a statement of support for HB 4167. Passing a Clean Energy Jobs act now is of utmost importance. Everyday in the news, I hear of new evidence of climate change that is escalating and shepherding in new exhibits of weather, water, and fire emergencies and disasters.

I am very frightened for the future of children and young people and am writing this plea motivated by a desire to slow, stop, and reverse the damage my and other generations have done to the delicate balance of our earth's life giving forces. We only have ourselves to blame and now must act and act quickly to make amends. We CAN'T be the last generations to live in comfort knowing that our younger survivors will face unimaginable circumstances. Sacrifice is a word that is avoided in discussing corrective actions, but it is a stark fact that WE ALL must be willing to give up our wasteful, extractive ways for the benefit for those who follow us.

Therefore, I support this bill. If it means this bill or Senate bill 1530A has to be referred to the voters, so be it. That is not my first choice but we are out of options and time. Tick Tock.....

Respectfully,

Helen Krieger
