Date: Wednesday, February 19, 2020 10:29:34 PM

The release of CO₂ from burning fossil fuels is responsible for 62% of global warming (EPA data). It is imperative that we address this quickly and effectively by reducing carbon emissions to avoid the worst case scenarios from global warming.

Every year we delay in taking action, the worse the effects of global warming will be.

Every year we delay makes the costs of mitigation and adaptation greater.

Pass HB 4167 now!
