

To whom it may concern,

I am very concerned with the proposals currently being debated in Salem regarding the cap and trade bills. Please do your due diligence and research the impact on small business. As a middle class American the additional costs of this bill will be detrimental to anyone earning a paycheck in Oregon. If this passes we will have to tighten our purse strings even more leading to higher unemployment and less products being purchased from our local suppliers.

I ask that you quash any cap and trade bill until you fully understand the impact on the Oregon economy.

Thank You for your consideration
