**Date:** Thursday, February 20, 2020 8:38:51 AM

---

No matter how many times you change numbers on it Cap and Trade has got to stop. You know it is wrong because you are unwilling to send it to voters. Oregonians are onto your scheme. There is ample evidence showing Oregon is already doing amazing things in our state and for our nation's interest on environmental impact. We reached a GHG goal set in 2007 to decrease our percentage per capita by 20% of 1990 averages by 2020. We exceeded that goal by 2016 4 years earlier while increasing our GDP and increasing population count that was expected! We should be celebrating our accomplishments!!!

I SUPPORT the Amendment which removes the Emergency Clause from A SB 1530/HB 4167.

I SUPPORT the 43 amendment which refers A SB 1530/HB 4167 to the people of Oregon for approval or rejection.

I oppose -41 amendment because it's a bait and switch tactic that creates the illusion that this bill is going to make utilities pay their own carbon tax, when in reality, you're sticking that provision into another bill where voters won't see it. NO WAY should we pay the carbon tax for utilities. In NO WAY should the legislature be hiding the truth from the people - that's what the Amendment 41 does and I oppose it.

I OPPOSE the fiscal allocation in A 51 to SB 1530/HB 4167, which costs taxpayers approximately \$20 MILLION for SB 1530/HB 4167.

LET US VOTE!

Cap and Trade will cost every Oregonian, particularly those on fixed incomes. We deserve to vote on a Bill that effects us all!

LET US VOTE!!

Sincerely,  
Robert Egner
