This whole thing has me sickened. Why would the name/number of the same Bill be changed at the last minute if there were not something to hide. And the times keep changing!! Just seems that someone is trying to make it more difficult for the Working Class to have their voices heard. This is beyond frustrating!!

I seriously can't understand why this whole thing can't be tabled with a few from both sides meeting to put their heads together to come up with a an alternative that meets the needs of ALL concerned. It's not like suggestions haven't been given, even though many out there don't realize that. We have some very knowledgeable people making the trek to the State Capital to represent all of us that can't be there! PLEASE listen to them!!

I understand the cry for a sustainable environment, but this Bill(s) seems a bit drastic, to say the least. Oregon produces such a very small amount of the Nations carbon waste, and is already lauded as one of the Greenest States, WHY is the need for such a drastic step necessary?? You've got to understand why so many see a dark side to this!

Many hard working people will be taxed out of a job, the cost of living for every person in this State will be astronomical! Why would you want to hurt the working class?

I am 62 years old and have lived in Oregon all my life, as have my parents, and their parents before them. But sadly, I feel myself looking to a more affordable State to retire to. I never thought I would consider moving from Oregon, but here we are! I have 2 boys that will also be affected by this! They have not yet started a family, but likely won't be able to afford to! Not in Oregon anyway! One of my sons works in the Timber Industry in Oregon. He is already considering moving to another State! Sad, sad, sad!!!

Please reconsider and drop this crazy Bill before it goes any further. (Well, both Bills now, and all associated with it, as there could easily be more that pop up) I'm not even going to ask to "let the people vote", even though that does seem logical, I am going to ask that it just be dropped and given more consideration from both sides!!

And I have never sent an email to the Oregon Legislature in my life! It's a sad, sad day!!
