

If this cap and trade bill passes, you will drive most families into dire financial crisis from all the tax increases coming from the utility companies. Majority of companies do not absorb the taxes by themselves, they pass it along to their consumers. Waiting around maybe for some tax break a year away is not the solution to this. Most homes come with natural gas, how is this consumers problem?

If you decide to do this, I guarantee that most of the working families here in Oregon will either move to some other state for lower taxes. Oregon, already has the highest gas tax in the nation at \$.36 per gallon which is outrageous.

If you decide to do this, you will drive Oregon economy into the ground, if you thought 2008 was bad, just wait and see what will happen if this bill passes, please vote no on this bill and find out what the impacts this bill will do to Oregon.

Thank you for your consideration in this matter.
