Subject: Comments re HB4167 - Climate Bill
Date: Thursday, February 20, 2020 11:22:31 AM

Dear Legislators,

I am a rural resident (near Roseburg) and am feeling the effects of climate change — more wildfires, droughts, storms, die off of Douglas firs - all becoming more severe. Climate anxiety and climate stress are now an issue, especially with our young people. It is time to act.

We need an improved strong climate bill to reduce carbon pollution and the ever worsening climate change it causes.

Thank you for your hard work on this matter.

Sincerely,

Diana Bailey
