

Dear Members of the Committee,

Thank you for your diligent work to take climate action now with HB 4167 - fully vetted legislation.

Oregonians cannot afford to wait another year for any meaningful action on climate change, We are ready to work together to get things done - to create living wage jobs that offer clean energy solutions while mitigating carbon emissions. This bill works hard to be fair to all stakeholders, and all voices have been heard - many, more than once.

It is time now to weigh in, considering the opinions of all - constituents, scientists, lobbyists, and other legislators - and move forward with a vote on this legislation.

I urge you to support the passage of HB 4167.

Thank you.

Sincerely,

Deb Patterson

Salem, Oregon
