

Hello,

I am very alarmed at the rate at which Oregon is doing nothing about the impending Climate Crisis. I recently read that Republicans plan to continue doing nothing because it *might be* a shame if gasoline prices were to go up. It's such a sorry excuse, I will not waste my time tearing the argument apart. It is imperative that we pass cap and invest policy now to *actually* protect ourself from the mental, health and financial impacts a radically different climate will bring to our area. LC 19 needs strengthening to make the biggest impact possible.

Please Make Oregon Green Again.
