

To whom it may concern,

Enough of the climate bill's. HB4167 is not a short session bill and needs to be put to the voters. Kill this and the rest of the climate bill's. This is an abuse of the short session and the people want to decide for themselves on this issue.

This issue is a world concern and Oregonians are not going to accept being taxed into poverty in order to set an example for the world. Besides, these climate bill's are not going to produce nearly any reward when compared to the damage it will do to the middle class in Oregon.

Thank you for your time,

Albert Porter,

Gervais, Oregon
