

Please, I urge you, do not pass ~~SB1530~~ **HB4167**. This will RUIN Oregon's economy and put thousands of Oregon's working class out of business/out of work...and all for absolutely NO IMPACT to Oregon, or the world's, "climate change" efforts. This is nothing more than a revenge dish served to benefit those companies, and FOREIGN COUNTRIES, who could afford to pay this tax themselves!! You were given a low cost, sustainable alternative, brought together by united OREGONIANS!!! Leave it to the people to decide!!!!

Personally speaking, Cap & Trade would cost our family farm over \$42000 in the first year alone, and that is just on the propane used to heat our commercial poultry barns. In addition to the tax on propane, we would also be looking at added fuel taxes and higher utility rates on our farm, and paying surcharges on freight from vendors forced to pass their increases on to us...and ultimately everyone.

I implore those of you who need to take a stand, please do so!!! We the people want to stand with you!!!

LET US VOTE!!!!

Respectfully,
Megan Cozart
