

To Whom It May Concern,

I am a registered democrat **IN FAVOR of SB 1506**.

Anyone that has been paying attention knows that Oregon has had a deep-seated corruption issue, going back decades now. Government opacity has allowed unspeakable acts against Oregon citizens to go unpunished and continue to be covered up by government officials. SB 1506 allows for more transparency and thereby more accountability. I personally have had issues attaining public records from two different government agencies. Records that were not questionable or sensitive in nature. Simple requests like, the date in which policy and procedure changed that had been previously posted online. After further inquiry, it turns out the policy and procedure had changed with NO record of why, when or who implemented the change. We the citizens that you represent need SB 1506 to pass.

Horrid acts against citizens that have taken place in our beautiful state would have been less likely if our government was more transparent. Please stop the cycle of abuse.
