

To whom it concerns,

I recently learned that ODOT is giving the legislature a briefing on the Cost to Complete report for the Rose Quarter Freeway tomorrow.

I am concerned about:

— the spiraling (and apparently limitless) rising cost of the expansion — an utterly opaque process that excludes public input (probably because this whole thing is a terrible idea, so let's rush it through in the dark of night?) — a lack of a complete & full Environmental Impact Statement

As a taxpayer, a car driver, a voter, and a citizen, I demand:

— a full public accounting for the potential cost of this project, including the maximum cost at which we will kill this project — a full public process for input — a lack of complete

— a complete & full Environmental Impact Statement.

Thank you
