

- To the Joint Committee on Transportation, regarding the Rose Quarter Freeway Project in Portland.

- ODOT's costs continue to spiral out of control,. This agency has an abysmal track record with accountability and transparency.
- This project is overwhelming opposed by advocates of so many stripes.
- There were 2000 public comments in opposition to this project in the public comment period.
- ODOT should be required to do a full Environmental Impact Statement to further study the social, environmental, carbon, and transportation impacts of this enormously expensive project.

- Thank you.
