

Oregon 100-Year Water Vision

HOUSE WATER COMMITTEE

Natural Infrastructure (working definition)

A strategically planned network of natural and working lands, such as forests, rivers, wetlands, and waterways that conserve and enhance ecosystem values and functions, and provide associated benefits for safe and healthy communities and vibrant local economies

Natural Infrastructure

- ▶ **World Resources Institute:** strategic use of networks of natural lands, working landscapes, and other open spaces to conserve ecosystem values and functions and provide associated benefits to human populations
- ▶ **European Environment Agency (Green Infrastructure):** a strategically planned network of natural and semi-natural areas with other environmental features designed and managed to deliver a wide range of ecosystem services' in both rural and urban settings
- ▶ **US EPA:** the interconnected network of natural and undeveloped areas needed to maintain and support ecosystems.
- ▶ **International Union for Conservation of Nature:** the interconnected network of natural and undeveloped areas needed to maintain and support ecosystems.

Natural Infrastructure

A strategically planned network of natural and working lands, such as forests, rivers, wetlands, and waterways that conserve and enhance ecosystem values and functions, and provide associated benefits for safe and healthy communities and vibrant local economies

- ▶ **World Resources Institute:** *strategic use of networks of natural lands*
- ▶ **European Environment Agency (Green Infrastructure):** *a strategically planned network*
- ▶ **US EPA:** *the interconnected network*
- ▶ **International Union for Conservation of Nature:** *the interconnected network*

Natural Infrastructure

A strategically planned network of **natural and working lands, such as forests, rivers, wetlands, and waterways** that conserve and enhance ecosystem values and functions, and provide associated benefits for safe and healthy communities and vibrant local economies

- ▶ **World Resources Institute:** natural lands, working landscapes, and other open spaces
- ▶ **European Environment Agency (Green Infrastructure):** natural and semi-natural areas with other environmental features
- ▶ **US EPA:** natural and undeveloped areas
- ▶ **International Union for Conservation of Nature:** natural and undeveloped areas

Natural Infrastructure

A strategically planned network of natural and working lands, such as forests, rivers, wetlands, and waterways **that conserve and enhance ecosystem values and functions**, and provide associated benefits for safe and healthy communities and vibrant local economies

- ▶ **World Resources Institute:** *conserve ecosystem values and functions*
- ▶ **European Environment Agency (Green Infrastructure):** *designed and managed to deliver a wide range of ecosystem services'*
- ▶ **US EPA:** *maintain and support ecosystems.*
- ▶ **International Union for Conservation of Nature:** *maintain and support ecosystems.*
