RE: HB 4207

Hello,

I am writing in support of HB 4207 creating a public database of police disciplinary action and information. There have been too many instances in which an officer's disciplinary record gets swept under the rug, that they are rehired and put back into the community with that community being aware of their record. Please know this is an important step towards progress, that when combined with the independent investigations of HB 4201 and the lateral accountability of 4205, will save lives.

Thank you,

Genevieve Schaack
