

As a small business owner in Oregon, and having been in business for 17 years, I am concerned that HB4212 will cripple our economy even further. As businesses struggle to open, or remain open, it is critical to write a portion of the bill in protection of businesses. We need actionable clauses that prevent anyone, citizens, businesses, or government entities from taking actions against businesses that can open, take proper precautions, yet still have COVID cases found in or around their business.

COVID findings should not be allowed to instigate legal actions against a business, business owner, employee, or facility. We need to create indemnity for businesses to give the owners, operators, and employees confidence to open the doors, keep the doors open, and drive our economy back into a thriving mode, not another Great Depression.

Thank you,

John Rivers
