Dear Joint Committee on the First Special Session Co-Chairs Kotek and Courtney,

I support an amendment to HB 4212 that would provide temporary and targeted liability protections to entities that are adhering to state and federal public health guidelines and rules to reduce the risk of COVID-19 exposure.

Governor Brown's executive orders have flattened the COVID-19 curve, but the changing regulatory environment also has created immense liability and uncertainty for public and private sector employers.

I am worried that even though we are following state and federal public health guidelines, we are still at risk of a lawsuit from a customer or employee saying that we didn't go far enough. One of these lawsuits would cripple my business. It's already tough to keep my doors open in these challenging economic times.

The ask is simple; please amend HB 4212 to include the language: "A person or entity acting in good faith shall not be subject to civil damages resulting from acts or omissions that complied with an executive order or regulation or were in accordance with guidance regarding COVID-19, unless the damages result from the person or entity's gross negligence or from the person or entity's reckless, wanton or intentional misconduct. This section applies to all causes of action that accrue during the complete duration of the COVID-19 emergency declaration, EO 20-03 issued March 9, 2020."

Thank you for your leadership on this important issue to those of us that are trying to do the right thing.

Sincerely,  
Zachary Poole  
323 Broadway St  
Seaside, OR 97138

**Subject:** General Liability Protections  
**Date:** Thursday, June 25, 2020 6:46:51 PM

---

Dear Joint Committee on the First Special Session Co-Chairs Kotek and Courtney,

Hello. I am in favor of amendment to HB 4212 that provides temporary liability protections to businesses that are adhering to both state and federal public health guidelines and, in addition to that, rules to decrease the risk of exposure to COVID-19.

The executive decisions of Governor Brown have helped flattened the COVID-19 curve, but the changing regulatory environment has created such much liability and uncertainty for both public and private sector employers.

I'm concerned that even though we are following both state and federal public health guidelines, we're still at risk of a lawsuit from a customer or employee stating that we didn't go do enough. Any one of these lawsuits would destroy my business. It's already nearly impossible to keep stay open in these challenging economic times.

Please amend HB 4212 to include this language: "A person or entity acting in good faith shall not be subject to civil damages resulting from acts or omissions that complied with an executive order or regulation or were in accordance with guidance regarding COVID-19, unless the damages result from the person or entity's gross negligence or from the person or entity's reckless, wanton or intentional misconduct. This section applies to all causes of action that accrue during the complete duration of the COVID-19 emergency declaration, EO 20-03 issued March 9, 2020."

Thanks for your leadership on this vital issue to those of us that are trying to do the right thing.

Sincerely,  
Ezra Caraeff  
2232 N Alberta St  
Portland, OR 97217

Dear Joint Committee on the First Special Session Co-Chairs Kotek and Courtney,

I support an amendment to HB 4212 that would provide temporary and targeted liability protections to entities that are adhering to state and federal public health guidelines and rules to reduce the risk of COVID-19 exposure.

Governor Brown's executive orders have flattened the COVID-19 curve, but the changing regulatory environment also has created immense liability and uncertainty for public and private sector employers.

I am worried that even though we are following state and federal public health guidelines, we are still at risk of a lawsuit from a customer or employee saying that we didn't go far enough. One of these lawsuits would cripple my business. It's already tough to keep my doors open in these challenging economic times.

The ask is simple; please amend HB 4212 to include the language: "A person or entity acting in good faith shall not be subject to civil damages resulting from acts or omissions that complied with an executive order or regulation or were in accordance with guidance regarding COVID-19, unless the damages result from the person or entity's gross negligence or from the person or entity's reckless, wanton or intentional misconduct. This section applies to all causes of action that accrue during the complete duration of the COVID-19 emergency declaration, EO 20-03 issued March 9, 2020."

Thank you for your leadership on this important issue to those of us that are trying to do the right thing.

Sincerely,  
Kenneth Liebl  
4818 Whitewater St NE  
Salem, OR 97305

Dear Joint Committee on the First Special Session Co-Chairs Kotek and Courtney,

I support an amendment to HB 4212 that would provide temporary and targeted liability protections to entities that are adhering to state and federal public health guidelines and rules to reduce the risk of COVID-19 exposure.

Governor Brown's executive orders have flattened the COVID-19 curve, but the changing regulatory environment also has created immense liability and uncertainty for public and private sector employers.

I am worried that even though we are following state and federal public health guidelines, we are still at risk of a lawsuit from a customer or employee saying that we didn't go far enough. One of these lawsuits would cripple my business. It's already tough to keep my doors open in these challenging economic times.

The ask is simple; please amend HB 4212 to include the language: "A person or entity acting in good faith shall not be subject to civil damages resulting from acts or omissions that complied with an executive order or regulation or were in accordance with guidance regarding COVID-19, unless the damages result from the person or entity's gross negligence or from the person or entity's reckless, wanton or intentional misconduct. This section applies to all causes of action that accrue during the complete duration of the COVID-19 emergency declaration, EO 20-03 issued March 9, 2020."

Thank you for your leadership on this important issue to those of us that are trying to do the right thing.

Sincerely,  
Kishan Naria  
3060 S 6th St  
Klamath Falls, OR 97603

Dear Joint Committee on the First Special Session Co-Chairs Kotek and Courtney,

I support an amendment to HB 4212 that would provide temporary and targeted liability protections to entities that are adhering to state and federal public health guidelines and rules to reduce the risk of COVID-19 exposure.

Governor Brown's executive orders have flattened the COVID-19 curve, but the changing regulatory environment also has created immense liability and uncertainty for public and private sector employers.

I am worried that even though we are following state and federal public health guidelines, we are still at risk of a lawsuit from a customer or employee saying that we didn't go far enough. One of these lawsuits would cripple my business. It's already tough to keep my doors open in these challenging economic times.

The ask is simple; please amend HB 4212 to include the language: "A person or entity acting in good faith shall not be subject to civil damages resulting from acts or omissions that complied with an executive order or regulation or were in accordance with guidance regarding COVID-19, unless the damages result from the person or entity's gross negligence or from the person or entity's reckless, wanton or intentional misconduct. This section applies to all causes of action that accrue during the complete duration of the COVID-19 emergency declaration, EO 20-03 issued March 9, 2020."

Thank you for your leadership on this important issue to those of us that are trying to do the right thing.

Sincerely,  
Aaron Grimmer  
723 SW Salmon St  
Portland, OR 97205

Dear Joint Committee on the First Special Session Co-Chairs Kotek and Courtney,

I support an amendment to HB 4212 that would provide temporary and targeted liability protections to entities that are adhering to state and federal public health guidelines and rules to reduce the risk of COVID-19 exposure.

Governor Brown's executive orders have flattened the COVID-19 curve, but the changing regulatory environment also has created immense liability and uncertainty for public and private sector employers.

I am worried that even though we are following state and federal public health guidelines, we are still at risk of a lawsuit from a customer or employee saying that we didn't go far enough. One of these lawsuits would cripple my business. It's already tough to keep my doors open in these challenging economic times.

The ask is simple; please amend HB 4212 to include the language: "A person or entity acting in good faith shall not be subject to civil damages resulting from acts or omissions that complied with an executive order or regulation or were in accordance with guidance regarding COVID-19, unless the damages result from the person or entity's gross negligence or from the person or entity's reckless, wanton or intentional misconduct. This section applies to all causes of action that accrue during the complete duration of the COVID-19 emergency declaration, EO 20-03 issued March 9, 2020."

Thank you for your leadership on this important issue to those of us that are trying to do the right thing.

Sincerely,  
Gerald Allen  
2510 Ashland St  
Ashland, OR 97520
